

STAGE 2'S ENHANCED VOICE SERVICES

Let Stage 2 demonstrate how upgrading your existing PBX business phone system with our cutting-edge telecommunications technology not only increases functionality, but also saves you money.

QUALITY COMMUNICATIONS

Using your existing PBX system, Stage 2 provides access to the highest quality phone service available via our state-of-the-art BroadSoft switch and Polycom HD Voice, which – in turn – allows you access to a feature-rich platform of cutting-edge services.

BUSINESS CONTINUITY/ DISASTER RECOVERY

Stage 2 delivers the incontestable peace of mind that comes with knowing that, in the event of an office emergency or inaccessibility, your company's phone calls will be redirected and your customers will be attended to.

OFFICE CONNECTIVITY

Stage 2 can interconnect your company – providing faster and more efficient transfer of calls among locations, integrated billing for all offices and access to single platform voice mail and automated attendant services.

CONSIDER A COMBINATION

Stage 2 can tailor a combination of enhanced voice and hosted business phone system services to fit your company's unique or emerging telecommunications requirements.

CUTTING-EDGE TECHNOLOGY = COST SAVINGS

Stage 2's enhanced voice customers typically enjoy cost savings on their monthly recurring telecommunications charges as a result of:

- Converged voice and data over broadband.
- Unlimited usage plan.
- Change routing and features instantly via the Web.
- Aggressive international rates.
- One number to call; one bill to pay.
